Fossils launch Music Video

It was an evening to remember for Bangla Rock fans at ArtsAcre Auditorium on 23rd June. Iconic rock band Fossils released their new album and launched the music video to their popular song Dewali Pee. Fossils began the evening in rocking fashion belting out hits like Ghreena, Hriday Bangbaar Gaan and Dewali Pee. The fans of the band were equally vocal in their appreciation, responding to the enigmatic frontman Rupam by singing along to the catchy choruses of each song. After their pulsating performance the band launched their newest music video. Directed by Aditya sengupta and Kheya Chattopadhyay the ambitiously mounted video to the song Dewali Pee explored the myriad of relationships between father and son across the different strata of society. "The truth and honesty which the song upholds, makes it a defining song of our generation" expressed the directors.

Rupam
